(Booklet contains 20 pages)

INSTRUCTIONS TO THE CANDIDATES

- This booklet contains 20 pages. Candidates must ensure it before writing and in case a defective answer book is issued it must be returned to the invigilator and a new and defect free booklet must be obtained.
- Before the candidate begins to answer, registered number, particulars of year, semester, subject, etc., are to be filled in. Failure to enter all or any of these particulars may disqualify the paper from valuation.
- Candidate is prohibited from
 - writing:
 - anything addressing the examiner in any manner whatsoever, in their answer book.
 - objectionable/obscene language in the answer book.
 - anything other than their Registered No. on the question paper.
 - either seeking or providing any assistance to the fellow candidates in the exam.
 - possessing a manuscript or a printed matter, in any form, in the examination hall.
 - bringing loose sheets or paper into the examination hall and detaching any paper from the answer book.
 - carrying Mobile Phone, Smart Watches and any other Electronic Gadgets etc., to Exam Hall.

Violation of these instructions will be viewed as a case of malpractice, which is a punishable offence.

- Before beginning to answer any question, candidates must write the correct question number, and should not write
- Answers must be written legibly on both sides of the paper. There shall be about 25 lines in each page. It is not necessary to begin each answer on a fresh page. Candidates should not use any other ink, except BLACK or BLUE ink.
- Rough work, if any, must be separated, from the subject matter, by a line and noted as rough work.
- The answer book, at the end of the examination, must be handed over to the Assistant Superintendent (Invigilator) by the candidate.
- This responsibility lies with the candidate only.
- Candidates should maintain absolute silence during the time of examination. Misbehavior, in any form, by the candidate, in the examination hall, will attract severe punishment.
- Candidates are permitted to leave the examination hall only after the allotted time.
- No additional answer books will be supplied.

To be filled in by the Examiner only

Q.No.

Part-B

2) JDBC it is used to connect java application to a database.

⇒

JDBC ODBC Bridge driver

- * It is connected to all the databases
- * JDBC calls methods converted to the function call
- * It is slow driver
- * It is efficient to use
- * It is also called as Universal driver.

Native API driver (TYPE-II)

- * It is almost equal to the type-I except ODBC
- * Install the vendor libraries on the client machine
- * In Native API driver we use client libraries
- * Native driver we will not java program (C, C++)
- * Better than type-I
- * Platform dependent
- * NO ODBC driver

Q.No.

Network protocol driver (TYPE-3)

- * Here we use Middleware software
- * Middleware software is between the java application and database
- * When java program sends it calls to the middleware soft
- * Here we use java programming
- * It is better than other driver
- * It is fastest

Thin driver (Type-4)

Q.No.	
3.	While we git to store the information in the branches they will create a multiple no of branches in the repository. * <u>Data integrity</u>: Here it does not change any information and while it change we know who is change, we can retrieve the before changed information. <u>Branching and Merging</u>: We use different branches to store the code or information and we can merge. Here we use the commit option for saving the file. <u>History and Tracking</u>: In git we can see the history of the information & Tracking the code or information. <u>Collaboration</u>: They are so many like Github, Gitlab.
	In git we use commands like i) git push: Save or upload the commit data on the repository ex: <code>git push origin</code> ii) git pull: Delete the data <code>git pull origin</code> iii) <code>git branch</code>: It is used to create a files in the repository <code>git branch</code> iv) git merge It is used to transfer from one to another <code>git merge</code>

Q.No.

git show

It shows the information which we are commit on the system.

7) They are three types

i) Scripting we use for declaration

ii) Directives

iii) Action is used to perform the actions

i) Scripting

a) Scripting - `<%`

b) Declaration - `<%! %>` we use for declaration purpose

c)

ii) Directives

a) Page forward

b) page include

`<% language="Java"%>`

iii) Action

Taglib

b) then we should use to execute sql queries
first we have to create statement

c) We use ResultSet to execute the sql queries

[illegible]
